AMENDMENT

Assistant Commissioner for Patents
Washington, D.C. 20231

Sir:

In response to the Office Action mailed July 17, 2002, please amend the
above-identified application as follows:

IN THE SPECIFICATION:

On page 1, line 25, paragraph 04, after "First" insert --,--. On page 1, line
31, paragraph 04, delete "of the" second occurrence.

[04] While the integration of data networking and optical networking is
a key to the next generation optical Internet, all-optical signal processing techniques
involving optical headers are still premature for practical system applications. All-optical
signal routing control has been suggested through the technique of Optical Label
switching. Optical Label switching incorporates a short optical label at wavelengths
adjacent a data signal wavelength, the label containing routing information in its
modulation. There are two key challenges in implementing Optical-Label switching
systems and routers. First, there is a stringent requirement for viable optical header
processing and optical switching technologies, specifically, optical label switching
networks will require a simple and effective method to swap headers in real time without
